Index

1.0 gamma script, see False profiles	and LAB, 208
1.4 gamma script, see False profiles	limitations of, 134, 189
Abbiati, Giuliana, 146, 429	splitting slider in, 132, 302
Actions, defined, 7, 116–117, 120	to protect skies, 131–132, 206–210, 302
Adams, Ansel, 408, 428–429	Blending channels:
Adobe RGB, 296, 324	Darken/Lighten modes in, 90, 115, 117, 136,
Adjustment layers, see Layers and layer masks	235, 345
Alpha channels, see also Layers and layer masks	in faces, 235
and Apply Image command, 97	green as target, dangers of, 85
in Channels palette, 198	and neutrals, 206
defined, 197	red as source, 115
in Darken Sky actions, 199	red as target, 90
in H-K action, 339	repetitions of, 97
Apply Image command, 73–74, 80, 97, 122	RGB composite as source, 97, 290, 295, 309, 320
Auto Color command, 424	RGB composite as target, 92, 94, 319
Auto Contrast command, 165	Blending Options command, see Blend If
Auto Tone command, 108, 139, 165, 168,	Blue channel:
171, 185	as darkest of three, 70, 106
Arches National Park, 194–195, 210	and hazy backgrounds, 140–141
Bach, Johann Sebastian, 339, 352	least important for contrast, 76
Background, blurring of, 333, 363	and yellow casts, 52
Beethoven, Ludwig van, 335, 347	and yellow objects, 85, 115, 363
Berlusconi, Silvio, 291	Bokeh, defined, 361
Bernardi, Alessandro, 132, 176, 219, 291, 324	Bridge, Adobe, 384, 390
Bigger Hammer action, 243–284	Brown, Russ, 46, 171, 353
and Camera Raw, 399	Browns, characteristics of, 57, 83, 114-115, 206,
and clouds, 320	287, 311
darkening layer of, 334	Brunelleschi, Filippo, 285
and faces, 329–334	Buonarroti, Michelangelo, 285
false profile/multiply compared, 329-334	Cameras:
options for in PPW panel, 320	vendor goals for, 165–66, 372
Soft Light mode in, 263, 266	and JPEG algorithms, 166, 383–385
Black channel:	and multiple light sources, 304
characteristics of, 101-102, 356	and sun-shade differentiation, 287
and ghosting of background, 357–358	Camera Raw, Adobe:
and H-K action, 104, 339, 356–366	Blacks slider in, 399–400
rules for construction of, 101–102, 356	Brightness slider in, 400–403
and shadow detail, 124, 366	changes in, 372
Black point, see Shadow (graphic arts)	Clarity slider in, 398, 401
Blend If:	Contrast slider in, 387, 400
choice of layer for, 132	curves in, 385, 401, 404

Camera Raw, Adobe (continued):	CMYK:
Exposure slider in, 398	blue weakness in, 131, 133
Fill Light slider in, 394, 399–400	black channel in, 101, 124, 356
Highlights slider in, 387, 390, 398–399	how to convert into, 356–357, 384
HSL/Grayscale panel in, 402	gamut limitations in, 14, 124, 130, 133
master curve approach in, 400–401	shadow detail isolation in, 124, 366
noise in, 402–405	Color Boost action, 111–144
presets, saving, 389–390	and cool casts, 35
recommended presets for, 385	curve angles in, 118
Recovery slider in, 387, 390, 394, 398	inverted mask with, 136
Saturation slider in, 401, 403–404	L channel as layer mask in, 122–123, 129
Shadows slider in, 399–400	layer mask can be unusual, 120–121, 127
sharpening in, 401–402	one-minute workflow with, 17, 121, 123
Split Toning panel in, 402	technical description of, 116–117
Tone Curve panel in, 389	Color mode:
Vibrance slider in, 401, 404	defined, 10–11, 38
White Balance sliders, 238, 396–397	and highlight protection, 53–54
Whites slider, 398–399	and Luminosity mode distinguished, 315
Capitol Reef National Park, 154–160	with Luminosity mode layers, 317, 322
Casts:	makes RGB behave like LAB, 42
correcting with opponent color, 68, 238	Color sampler tool, 41, 46, 114
attacking neutrals to prevent, 52	ColorMatch RGB, 324
caused by harsh lighting, 49	Configurator, Adobe, 7, 120
cold, red channel to reduce, 42–43	Culture, influence of on preferences, 40
conflicting, 234	Curves:
cool, when unacceptable, 35, 42–43, 58, 234	adjustment dialogs for, 43, 73
curves as first resort for, 68	as first resort, 68
green always undesirable, 28, 88	initial color, correction of with, 35-70, 234-5
pink, and green channel, 156	interface issues with, 43
in shadows, 65	LAB, difficult to control, 42
quartertones as indication of, 238	master, 374
warm often preferable, 40, 88	multiple, to adjust color, 319
yellow, and blue channel, 52	multiple, to adjust contrast, 199
Chagnon, Bevi, 25, 75, 412	orientation of, 42–43, 119
Channel Mixer command, 92	S-shaped, 77, 90, 129, 235
Channel blending, see Blending channels	S-shaped inverted, 255
Channels palette, 109	and selections, 205
Chromatic adaptation, 65, 87–88, 232–233, 341;	steepness, impact of, 77, 128–129
see also Human visual system	U-shaped, 129–130, 139, 396
Clouds:	to masks or layer masks, 121, 127, 129,
and Bigger Hammer, 320	134–135, 396
color change with darkness of, 40	Darken mode, 81–82, 214–215
color settings in, 319	Darker Color mode, defined, 81
and Darken Sky actions, 320	Darken Sky actions, 193–215; see also Skies
as highlights, 9, 210, 287, 319	deleting alpha channel, 202

Darken Sky actions <i>(continued):</i>	and makeup, 315
isolating other blues in, 201–204	role of green channel in, 92, 175, 223, 235, 316
how masks are derived, 213–215	Florence, Italy, 285–286
SC and B differentiated, 198, 213–215, 320	Gamma, see Adobe RGB; Exposure command;
technical description of, 320	False profiles; sRGB
Darker Color mode, 81, 322	Gaussian Blur filter, 290, 296–302
Darwin, Charles, 287, 424	Ghiberti, Lorenzo, 285
Difference mode, 213–214	Grand Canyon National Park, 71–71, 87–91
Domitian, 193	Grass, <i>see</i> greenery
Donatello, 285	Gray, James, 5, 16, 36, 232–233, 302, 323, 373
Engels, Friedrich, 232	Grays, gray card, see Neutrals
Equalize command, 165–173	Green channel:
Esteves, Adriano, 5, 176–177, 353	danger of blending into, 85
Everglades National Park, 93–95	in faces, 92, 175, 223, 235, 316
Exposure command, 239, 305–306, 309,	most important channel for detail, 76, 100, 237
324, 366	multiple curves in, 106–107. 199
Faces, 216–242; see also Fleshtones	in natural greenery, 320
and Bigger Hammer action, 329	similarity to CMYK magenta, 42, 44
detail dangerous in, 92, 150, 219	Greenery, natural:
exercise, influence on, 52–53	channel structure of, 293
green channel role in, 92, 175, 223, 235, 316	evergreens, values for, 57
and H-K action, 235, 237, 338	green channel role in, 320
and Hiraloam Darken, 410, 417, 422, 427–428	LAB values in, 45, 51, 154, 170, 287, 320
LAB values in, 51–52, 233–234, 315	H-K action, 335–368
and makeup, 58, 315	Ersatz Black characteristics, 339-356
male and female, 174, 326	and faces, 235, 237, 338
and MMM Color layer, 317	Hair:
and MMM Luminosity layer, 150, 174, 237, 317	black, and simultaneous contrast, 242
quartertone moves in, 316	LAB values for, 58, 234
refusal to accept redness in, 150, 217, 317	and sharpening, 419
relation of color to detail in, 234	Haloing:
two-version approach to, 225, 234–242	and Bigger Hammer, 274–284
False CMYK action, 356–357, 364–366	and Blend If, 302
False profiles, <i>305–334</i> , 366:	blur filters, choice of to avoid 296–302
and 1.0 gamma script, 306, 324–325	and Lighten mode, 302
and 1.4 gamma script, 306, 309, 324	painting to avoid, 301–302
and Bigger Hammer compared, 328–334	requirements for obvious, 276, 301-302
choice of layer for mask with, 309	in skies, 194–296, 301
dangers of, 324	HDR, 189
defined, 324	Helmholtz-Kohlrausch Effect, 104, 242, 341, 358
and Exposure compared, 305–306, 324	see also H-K action
Fariña, Richard, 43	Helmholtz, Hermann von, 104, 341, 343–344
Ferdinand and Isabella, 303, 306, 310	Highlight:
Fleshtones:	defined, 6, 49, 179
impact of ethnicity on, 52-53	identification of, 46, 49, 51, 114, 123-124, 140,
recommended LAB values for, 51–52, 229, 315	199, 234, 316, 326

Highlight (continued):	greenery, recommended values in, 45, 51, 287
neutrality considerations in, 316	imaginary colors in, 100, 124, 133
Bigger Hammer action to enhance, 245-284	in Info palette, 40
when to establish, 54, 115, 378	inverted S curve to AB, 255
threshold layer to locate, 51, 114, 234, 347	L channel, characteristics of, 97, 102, 118, 124, 233
recommended values in LAB, 125	Luminosity mode in, 90–100
Hiraloam, see Sharpening and Sharpen action	neutrality defined in, 40, 117–118
Histograms, 165–166	subtle adjustments difficult in, 38, 42
Hue/Saturation command, 68, 136, 154, 205,	skies, recommended values for, 39–40, 51
398, 402	and Shadows/Highlights command, 186-187
Human visual system, see also Chromatic	and sharpening, 409, 429
adaptation; Simultaneous contrast:	Layers and layer masks:
age, effect on, 235	A or B of LAB as, 15, 133–135, 138, 235
cool casts rejected by, 46	activity of, how to verify, 290
compared to camera, 11, 87–88, 104	alternate sources for, 315
and fog, 132	artificial black channel as, 295, 366
and harsh lighting, 141	when to blur, 258, 290, 293, 322–323. 363
and multiple lighting conditions, 65	changing opacity of, 128–129
in scenes both light and dark, 11, 287	choice of channels for, 292, 301, 309
last thing seen can warp judgment 7, 14, 22,	choice of source layer for, 292, 300–301
44–45, 113, 274	and Color Boost action, 120–121
quartertone sensitivity in, 128, 360–361	and colorspace conversions, 201
and survival, 232–233, 360–361, 423–424	curves to, 121, 127, 129, 134–135, 396
Hunt, R.W.G., 176, 178, 339	defined, 120
Info palette, 39–41, 52	filling with black, 201
Khrushchev, Nikita Sergeyevich, 307–310	inverted L channel as, 136
Kohlrausch, Rudolf, 341	and multiplication, 306
LAB:	quartertone retention with, 290
50% gray fill in, 214–215	retaining copy of, 202
A channel, characteristics of, 39, 42, 88, 117–118,	RGB composite as, 189, 238, 290, 320, 325, 394
138–139, 152, 170, 351–352	unusual styles of, 127, 129, 139
AB channels as mask sources, 215, 255	Lighten mode, 70, 356
angles of curves in, 118	Lightroom, Adobe, 391–392, 402
and Blend If, 208	Luminosity mode:
	and Color mode distinguished, 10–11, 315
cast detection in, 39, 41, 319 and Camera Raw White Balance sliders, 396	0
	with Color mode layers, 317, 322
and Color Boost action, 38	defined, 10–11, 73, 76, 86
and Color/Luminosity modes, 98–100	LAB-RGB differences in, 98–100
and simultaneous contrast, 65	recomputation of highlight in, 106–107
B channel, characteristics of, 39, 117–118, 131,	Man from Mars, see MMM action
134, 151, 139, 170, 208, 255	Masks palette, see Properties panel
Darken mode to isolate colors in, 214–215	Maslowski, Clarence, 219, 427–428
described, 39, 83, 117, 139	Median filter, 298–301
faces, recommended values for, 51	Mergenthaler, Ottmar, 369
gamut problems with, 130, 133	Midtone, defined, 6, 179

MMM action 145–178:	and faces, 316, 417
early versions of, 12, 31, 150–152, 363	human sensitivity to, 65, 128, 360
and faces, 160–163, 174, 219, 237, 241	and JPEG algorithms, 384
neutral protection in, 152, 159–161	layer mask to hold depth of, 290
saturation layer in, 176–178	and Sharpen action, 418
when to avoid, 212, 219	Radius, see Bigger Hammer action; Dust &
which photos benefit from, 150, 161	Scratches filter; Gaussian Blur filter;
MMM + Color Boost Action, see Color Boost	Median filter; Motion Blur filter; Shadows
action; MMM action	Highlights command; Sharpen action;
Modern Man from Mars, see MMM action	Surface Blur filter; Unsharp Mask filter
Motion Blur filter, 298–301	Range, defined, 6
Multiple versions approach, 9, 17, 234–242,	Raw files:
355, 398, 415–416	advantages/disadvantages of, 372
Multiplication:	batch processing in, 387-391, 394-396
and colorspace, 302	and Bridge, 384
curves added to, 330, 333	converters can preempt later improvements, 375
more than one to same file, 292–293, 298–299	converters changing rapidly, 372
Multiply mode, 306, 309	converters, limitations of, 377–378
Neutrals:	defined, 372
and channel blending, 206	definition of <i>original</i> in, 373
defined, 28	and highlight recovery, 385–387
evaluation of, 36, 46, 52, 54–55, 58	white balance information in, 373
and eyedropper, 38	RawTherapee, 392
and gray card, 60–65	Red channel:
as key to focus, 381–382	in browns, 114–115
LAB formula for, 40	and cool cast reduction, 42–43
and MMM action, 152	cyan channel, relation to, 44, 101, 356
and predators, 232	faces normally worst in, 223
RGB formula for, 28, 46, 75, 374	and hazy backgrounds, 140–141, 345
Olivotto, Marco, 5, 46, 132, 235, 324, 355	in red objects, 92, 95
Overlay mode, 245, 247–250, <i>258–284</i>	in skies, 114–115
Pavel, John, 25, 153, 205, 306	Reds, characteristics of:
Pedro the Cruel, 303–304, 310	LAB formula for, 170
Photoshop LAB Color, 118	often lack detail, 95–100
Pizarro González, Francisco, 185–190, 323	rosiness and anger, 58
Portraits, see Faces, Fleshtones	Reflections, treatment of, 172-174, 286
PPW panel:	RGB:
and Bigger Hammer options, 320	in Color mode is like LAB, 42
and false profile scripts, 306	difficulty of evaluating color in, 41
and image history, 164	grayscale weights of channels in, 76, 263
Professional Photoshop, 174–175, 363–364	Luminosity mode in, 98–100
Properties panel, 119, 121, 295	neutrals, formula for, 28, 46, 75
ProPhoto RGB, 324	numbering system in, 46
Quartertone:	RPP, 392
defined, 6, 179	Rus, Jacob, 55, 110
evolutionary factors in evaluating, 232–233, 361	S curve, see Curves

Sand, LAB values for, 57, 311 Shostakovich, Dmitri Dmitreyevich, 339 Schumann, Robert, 339, 341 Simultaneous contrast, 65, 88, 142, 146, Scum dot, defined, 84 232-233, 242, 341; see also Human Selective Color command, 213-215, 402 visual system Shadow (graphic arts): Skies, 193–215, see also Darken Sky actions: CMYK detail advantage in, 124 bluest object in image, 198, 302 defined, 6, 49, 179 Blend If to isolate, 131-132, 206-210 enhancement with Bigger Hammer, 263-266 color relation to rest of image, 205 identification of, 46 gamut problems in, 130 LAB more subtle than RGB in, 184-187 and haloing, 301-302 recommended values for, 124 likened to skin, 219 Shadow (literal) LAB values for, 39–40, 51, 154 darkening of, 104 noise removal in, 204, 208, 210 blue cast in, 41, 46, 65 red channel role in, 114-115 Shadows/Highlights command, 179–192: replacement of, 196-198, 210 Amount field in, 184, 186 yellow, influence upon, 319 Skintones, see Faces, Fleshtones Clip setting in, 184–185, 284 Color Correction field in, 185 Skin Desaturation action, 220, 223–225, emulation of with other methods, 189-191 228, 328 forgoing experimentation with, 214 Soft Light mode, 263–266 sRGB, 131, 296, 324 in LAB, 186–187 Strauss, Levi, 25 optimal time to use, 184 Radius field in, 190 Surface Blur filter, 135, 208, 297–301 Three-quartertone, defined, 6, 179, 184 recommended settings for, 180 Tonal Width setting in, 184, 186 Threshold command, 51 when use is debatable, 287 Tomatoes, characteristics of, 176–177, 339–343 Sharpening and Sharpen action, 407–429: Tonal range, defined, 6 action and USM compared, 412-413, 419 Trees, see greenery Unsharp masking (USM), see Sharpening and blurring, relation to, 274–275 conventional, defined, 418 Sharpen action Vegetation, see Greenery evaluation on screen of, 428 Vibrance command, 154 of faces, 410, 412–415, 417, 422, 424, 427–428 Villa-Lobos, Heitor, 339 by halo map, 277, 413, 415-419 Weber, Gottfried, 347 Hiraloam Color, 418, 423 Hiraloam Darken, 410, 422-423, 426-428 White point, see Highlight Yellows, characteristics of: Hiraloam Lighten, 423 and blue channel, 85, 115, 363 hiraloam, misuse of 24-25 light halos more offensive in, 408–409, 419 and human aging, 235 masks provided by action, 419-423 LAB formula for, 170 noise reduction in, 419 need to avoid greenness in, 58 premature, disadvantages of, 401-402, 419, 422 Yellowstone National Park, 132–137 and resolution, 418 Yocum, Frederick, 14, 46, 190, 220, 357–358 subjective nature of, 408, 428 Zapf, Hermann, 195
